EDUCATION

UBB
Philosopy Bachelors

2019
Cluj, Romania

UNIVERSITY OF SALENTO
Law Erasmus

Lecce, Italy

SKILLS

Programming Languages	JavaScript, HTML, CSS
Libraries/Frameworks	React, Bootstrap, React Router
Tools / Platforms	Figma, VisualStudio, GitHub
Databases	Firebase

PROJECTS / OPEN-SOURCE

MANGATAGALLO | Link   React, React Router, Firebase,

I designed and developed this E-commerce website because I wanted to practice the integration of client-side routing. Features: connection to the Firebase Database, product sorting and filtering, dynamic shopping chart, client-side routing, responsive design

OLDGRAM | Link   Firebase, React, React Router,

I made an Instagram clone with a twist. The ui was inspired by one of the solo projects I made at Scrimba to which I added the functionalities and the complete design. Features: connection to the Firebase Database, user authentication, search input, client-side routing, responsive design

FLEXNET | Link   React, React Router, API

This is a website where you can find information about your favorite movies. Features: data fetching, API integration, search input, responsive design

SCHONESMOBELHAUS | Link   React, React Router

This is the first website I made. For the design, I found inspiration in the company story and I tried to express the joy of a new beginning. SchonesMobelHaus is a moving company based in Germany. Features: form integration, animations, responsive design

LITTLELEMON | Link   React, React Router

I started this website as part of a graded assignment during the "Meta Frontend Developer" course. Being pleased with the result, I decided to take the development further and transform it into a beautiful web application model. Features: online table booking, booking management, client-side routing, carousel, responsive design
